

# Position your brand as the trusted guardian of digital life

Complete consumer cyber security solution for your customer base

## F-Secure Total

Provide your customers scam protection, internet security, privacy and identity protection - all in one solution. F-Secure's solution integrates seamlessly with your offering, creating revenue streams while positioning you as a trusted digital safety provider. Expand with F-Secure Embedded Security for connected homes and your own apps for complete protection.

# Create value with online security

Transform cyber security into a profitable customer retention tool

## Personal Scam Protection

Help your customers protect their personal information and money with AI-enhanced Scam Protection that consumers can easily understand and trust.

## Safe Online Banking

Give your customers confidence in their digital transactions with protection that safeguards their money and personal data.

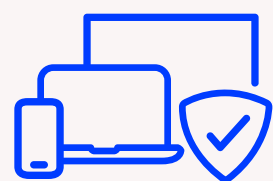

## Smart Shopping Protection

Enable worry-free online shopping with real-time trustworthiness ratings for online stores, helping customers find legitimate deals while avoiding scams.

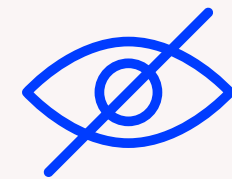

## Browsing & Phishing Protection

Protect your customers' families from dangerous websites and phishing attacks with automatic threat blocking that works invisibly in the background.

## Device Protection

Keep all your customers' phones, tablets, and computers safe from ransomware, infostealers, trojans and other malware with award-winning protection technology.

## Privacy Protection & VPN

Offer customers peace of mind with encrypted connection that protects their privacy even on public WiFi networks.

## Identity Theft Monitoring

Provide proactive protection by alerting customers immediately if their personal information appears in data breaches.

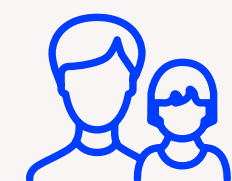

## Cyber Help

Support your customers with expert assistance during security incidents, positioning your brand as their trusted digital safety partner.

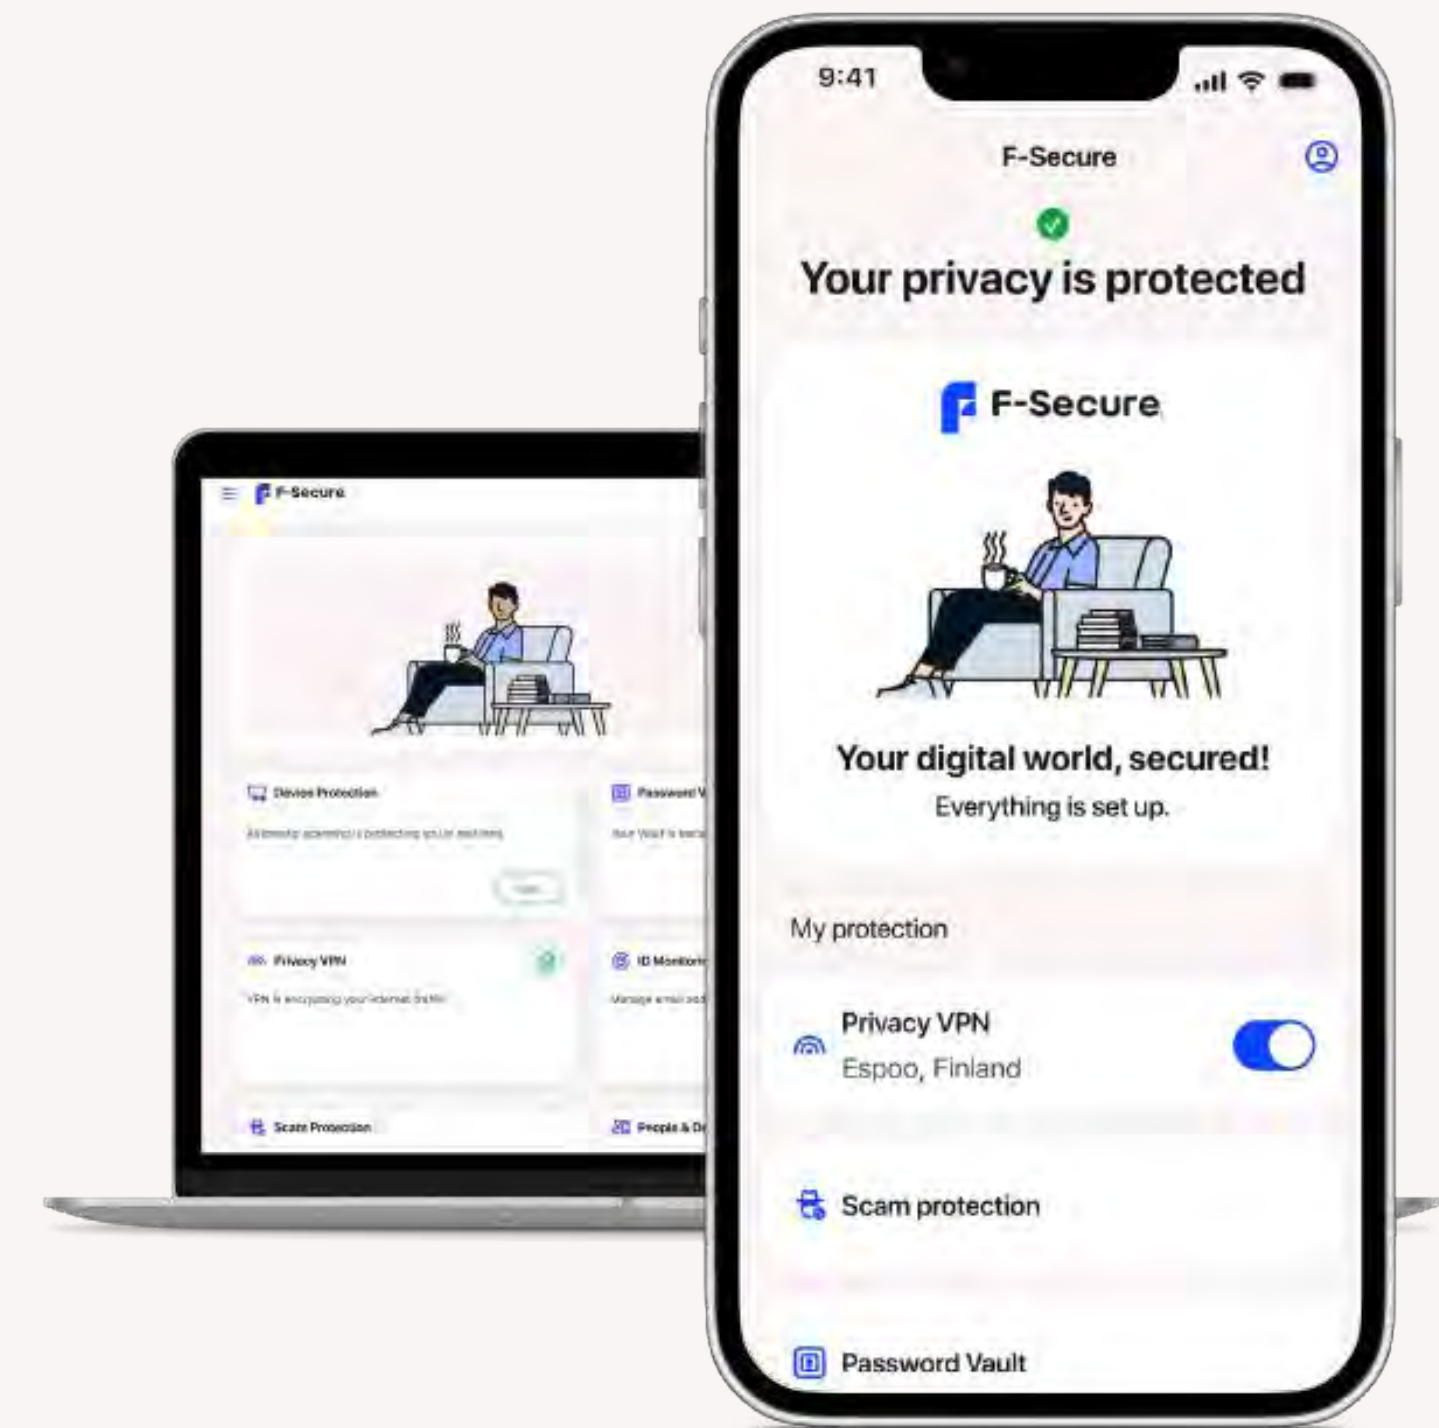

## Password manager

Help customers create, store, and use strong passwords across all their devices without the complexity, solving a problem every consumer faces.

## Content filtering for children

Appeal to parents by offering easy to enable and manage content filtering with complete online security for children.
